## ECOPOOL - ADVANCED IN-FLOOR CIRCULATION

### A BOLDT POOLS & SPAS EXCLUSIVE

The EcoPool In-Floor Circulation System is an advanced in-floor pool circulation system that improves your overall swimming environment. Using the latest state-of-the-art in-floor technology, EcoPool circulates water from the pool floor and evenly disperses warm water. This creates a more comfortable swimming environment, eliminates cold spots and can even help extend your swimming season. EcoPool is a smarter way to build a swimming pool.

### ECONOMY. ECOLOGY. ECOPOOL. CHEMICAL CIRCULATION

Ordinary pools have a higher concentration of chemicals near the surface with many chemicals wasted due to the sun and wind. This can lead to poorly circulated algae-prone areas and a high concentration of chemicals and heat near the surface. With EcoPool, chemicals are evenly distributed. This creates a healthier, more algae-free pool with fewer chemicals lost into the air, yielding chemical savings each month.

### HEAT CIRCULATION

With traditional pools, water is circulated near the pool surface through standard inlets. Since EcoPool is engineered to circulate water from the pool floor by the natural process of rising heat, heat energy is evenly dispersed. This creates a more comfortable swimming environment, eliminates cold spots and can help extend your swimming season. Best of all, less heat energy escapes into the air which saves energy and money.

## ECOPOOL COMPONENTS

### CIRCULATION NOZZLES

Hydraulically-engineered circulation nozzles are placed into the pool floor. When the pump is activated, nozzles pop up and rotate 360 degrees to deliver a jet stream of fresh water across the pool floor.

### DEBRIS CONTAINMENT CANISTER

Trap leaves and debris before it gets to your pool pump and filter. The basket holds up to 68% more debris than any other equipment side canisters which means fewer trips to empty the basket. Having the EDC will reduce cleaning time and the high-efficiency design ensures maximum water flow with minimal pressure loss. It conveniently installs on your equipment pad before the pump to prevent dirt and debris from clogging your pump basket.

## 6. CHOOSE YOUR LINER

Our incredible selection of pool liners is one of the largest in the industry and features stylish and captivating designs that fit with any backyard oasis. ## WHAT COLOUR POOL WATER ARE YOU LOOKING FOR?

Choosing a liner can be one of the most enjoyable items to add to your backyard's overall design. Before you begin the search for the right liner you should take a few factors into consideration. How much sunlight does your pool get? Is your pool shaded by trees or other obstructions? Do you tend to swim at day or at night? How deep is your pool? All these factors can change the colour of your pool water, and can help you decide on the colour and pattern of your liner.

Our online Water Colour Selector can help you visualize how different liner colours react differently when water is added. Visit us online at [boldtpools.ca/liner-home](http://boldtpools.ca/liner-home)

### ALLEVIATE ARTHRITIS PAIN

The soothing warmth provided by a soak in the hot tub allows Arthritis sufferers relief from soreness and discomfort. The buoyancy of the water helps to ease joint pain caused by the absence of cartilage in the joint.

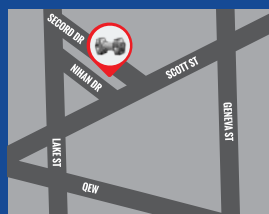

### ENJOY MUSCLE RELAXATION

Hot tubs reduce muscle soreness with targeted hydrotherapy jets that pinpoint stress points to provide maximum relief.
