2017 POOL CLOSING FORM

BOOK YOUR POOL CLOSING ONLINE AT BOLDTPOOLS.CA/POOL-CLOSING

To ensure your closing can be completed as scheduled, follow these important instructions prior to our crew arriving.

✔ CUSTOMER TO-DO CHECKLIST

BEFORE CLOSING

- If you have a sump well, please pump down 48 hrs prior to closing
- Vacuum & clean your pool, and remove all debris prior to your closing
- To ensure your pool water is chemically balanced, bring in a water sample 1 week prior to closing
- Drop-in steps & sand bags must be removed prior to closing
- Ensure that all equipment, accessories & winter plugs are accessible for our crew

AFTER CLOSING

- Store your cartridge filters inside your filter (or bring indoors) and be sure to bring your salt cell indoors for the winter

! PLEASE NOTE THE FOLLOWING INFORMATION

A pool put to bed clean in the fall, is a clean pool upon opening in the spring

A pool cannot be closed with significant water in the sump well

Water left over the winter that is not properly balanced can cause liner fading, wrinkles & staining issues

We are not responsible for winter covers coming out of the track or Fabrene covers coming loose from a faulty water bag

We only use water bags to secure a tarp cover; we can NOT use cinderblocks or any other unapproved method of securing the cover. If no water bags are provided, we will supply new water bags and they will be added to your final invoice

The following services are not part of your pool closing:

We do not place salt cells indoors, remove drop-in steps and sand bags

***If your pool is not properly vacuumed when our closing crew arrives, it will be closed dirty. In extreme cases, your closing will be rescheduled.**
