Boldt Installed an inground pool for us this past Spring. We were very impressed with the entire crew who worked on the project. Brice was on top of every detail to ensure the pool was constructed perfectly. After construction was complete, Tony helped train us on how to maintain and use the equipment. It was great to be able to text or call them and they would respond very quickly. The way everyone worked and smiled, you can tell that this is a well run and organized company

the stevenson's LAKESIDE RETREAT

This perfect backyard retreat has ample space for entertaining, tanning & everything in between!

The Stevenson family backyard is where we want to be on a hot summer's day! With panoramic lake views and a modern seating area, this one of a kind backyard is built to entertain. The Stevenson family chose a modern, rectangular pool to complete their backyard. Their 16' x 32' Rectangular Inground was finished with our Blue Bonair Vinyl Liner, resulting in the rich, bright, blue pool water that you are seeing pictured.

The detail put into this outdoor space is truly spectacular; we felt like we were on vacation while we

were working! From the outdoor pool house/cabana structure, to the luxurious pool deck complete with sleek Chaise Loungers, the Stevenson backyard is inspiring from all angles.

The Stevenson family opted for Custom Vinyl Over Steps for their pool's entry way. The Stevenson's also selected Mediterranean-style landscaping and a modern concrete/wood patio design to complete their waterfront oasis. We love the Stevenson's backyard!

Boldt Pools installed our new pool late last summer and our contact with them has been terrific. Right from the design meeting with Greg Pickering, through to the install team, Brice and Jim did a phenomenal job as well as Tony our customer service connection. As a brand new pool owner (and salt water at that) Tony has been more than patient with my numerous ?'s as I navigate learning about the in and outs of the salt water pool. You don't know what you don't know and Tony has been fantastic!! In fact our experience was so outstanding that we recommended our neighbours give Boldt a call for their new pool, they did and are now enjoying their pool!! Thanks everyone , we (as well as neighbours, family and friends) are thoroughly enjoying the fruits of your labour!!!

Have You Considered Salt?

We've seen the trend switch from traditional systems to new & improved salt water sanitation systems. Here's a breakdown of some of the benefits:

ENJOY CONSISTENT SANITATION
With a salt sanitation system, you'll enjoy the benefit of a more consistent sanitation system as the salt cell itself is responsible for creating its own chlorine to sanitize the water. Chlorine in a salt pool? Yes! Unlike a chlorine system, where chlorine has to be handled and added manually, salt systems regenerate natural chlorine to provide a safe and balanced system.

IT SAVES TIME
Salt water pools require less maintenance to alleviate traditional harms like algae, because algae does not grow as quickly in salt water pools due to more consistent sanitation. The water is naturally transformed from salt to chlorine saving you time by not having to balance your water as often.

SPEND LESS ON CHEMICALS
Once you've added your salt to your pool for the season, chances are, you won't have to add any more. The only time you'll need to replenish the salt will be after a hard rainfall where the water balance may have skewed, when you have to re-fill, or when backwashing. You won't need to handle chlorine or worry about getting it on your clothes as the salt system produces its own natural chlorine.

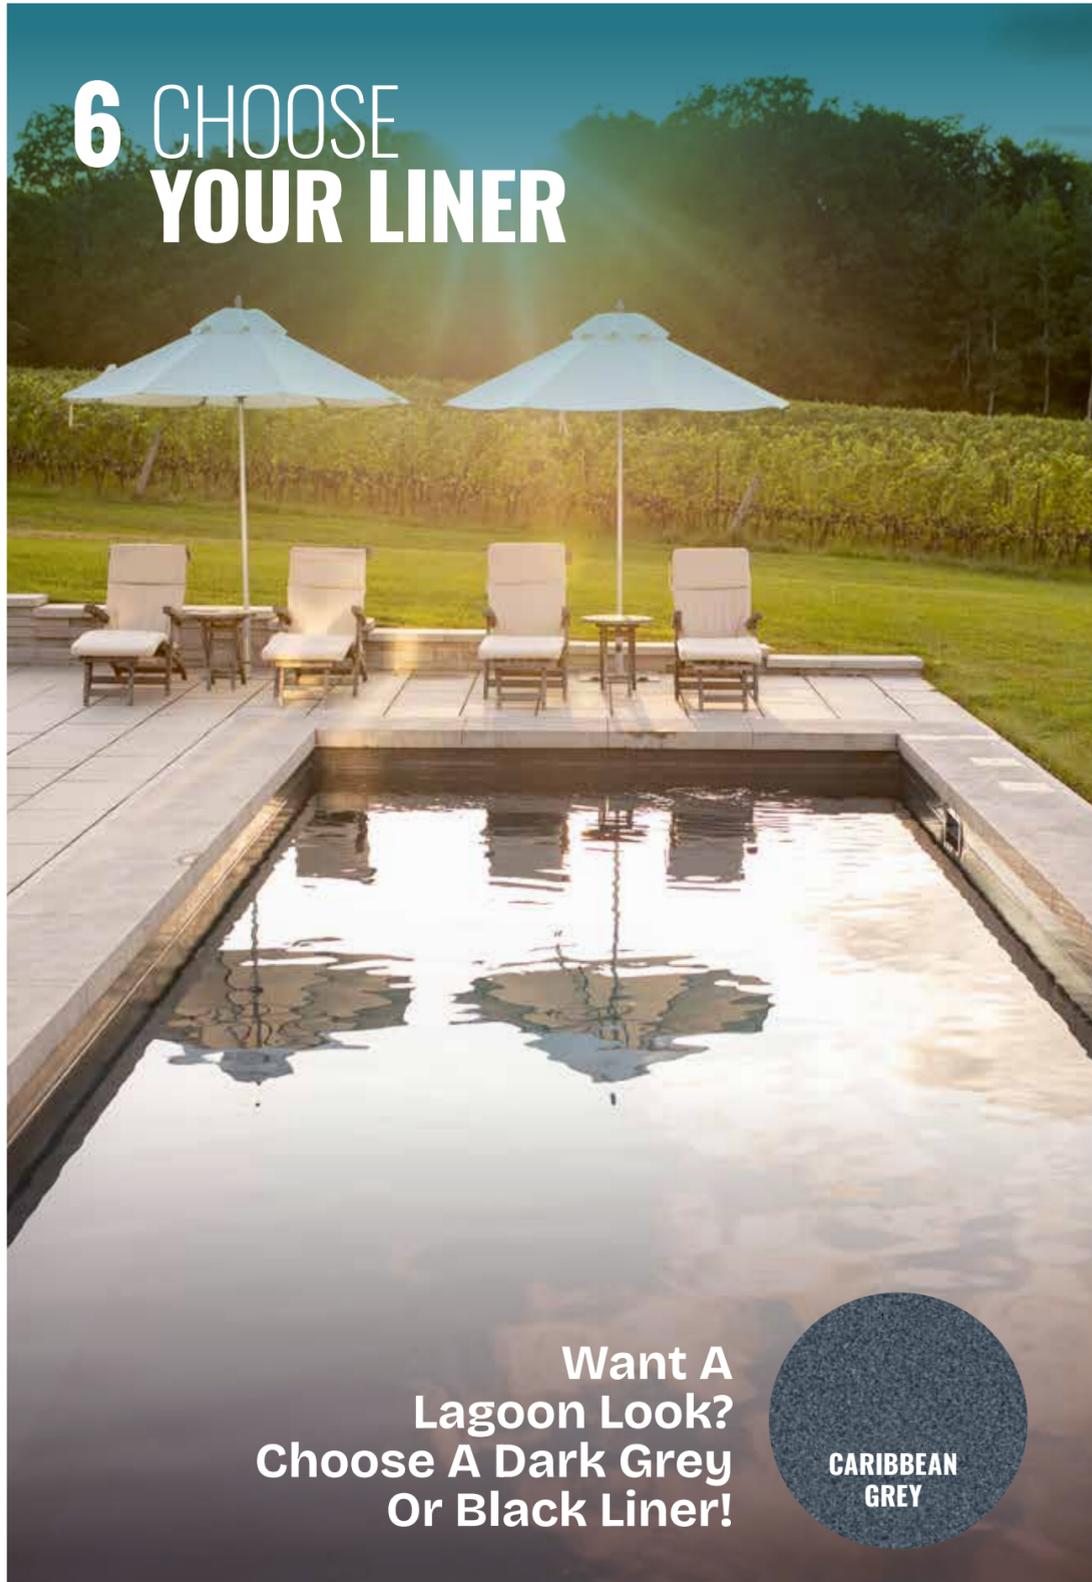

SILKY, SMOOTH WATER
One of the major benefits to salt water pools is that they avoid the build-up of chloramines. The consistent replenishment of chlorine prevents strong chemical odours and allows for Pool owners to enjoy silky smooth water that is easier on your skin, eyes and hair. Salt water systems operate a lower chlorine level

which means the water is less drying to your skin. And don't worry about tasting the salt in the water. A swimming pool will operate at approximately 3,000 ppm of salt, whereas the ocean holds a 35,000 ppm of salt. Enjoy more of your pool with less work.

These are just a few of the primary benefits to having a salt water pool. In the end, the decision comes down to how you plan to use your pool, the overall maintenance you want, and the feel you want to achieve when you first walk in. We carry a selection of Chlorine, Bromine, Ozone, UV, and Salt Systems to provide you with all the options for keeping your pool clean.

If you have any questions, our knowledgeable staff are here to help you make the right choice for your unique backyard oasis.
